The role of the citation-form in lexical access. An experimental study

Lexemes of natural languages are referred to by so-called “citation-forms”, metalinguistically prominent. Do they also enjoy a lexical access advantage? In lexical decision experiments, the Infinitive (citation-form of Italian verbs) was compared with the Present Indicative 3SG, the most frequent form. Results suggest that the cognitive impact of the Infinitive depends on interaction with various morphological and psycholinguistic factors, whose relative weight might be a language-specific function.

Mercoledì, 20 febbraio 2019, ore 10:15-12:00
aula KOL-E-13, Rämistrasse 71, 8006 Zurigo

Docenti, studentesse e studenti e tutte le persone interessate sono cordialmente invitate/i alla conferenza.

Prof. Dr. Michele Loporcaro

Prof. Dr. Tatiana Crivelli, Seminarvorsteherin
